

100 Real Professors

A magazine-style scouting guide for funded MSc/PhD routes in respiratory sound AI, biomedical signal processing, wearable health, low-cost clinical monitoring, and digital health systems.

100

source-linked real-life academics

14

regions / funding ecosystems

5

fit metrics per profile

100 source-linked professor targets by region

Verification note: each entry is tied to an official university, research-group, institutional, or lab profile URL. A few official sites block scripted checks, so the source register gives the human-checkable URL rather than pretending automation is perfect. Scores are practical targeting scores, not rankings of academic quality.

How to Read This

Fit: How naturally the professor's work connects to pediatric lung sounds, digital stethoscope work, biomedical signals, low-cost monitoring, and clinical workflow literacy.

Funding: How realistic a funded route looks from the country system and typical doctoral model.

Tier: Outreach order: First-wave, Strong, Watchlist, or Niche.

Best use: The angle that makes the professor worth reading about during a slow office day instead of becoming another spreadsheet row.

The 20 Most Natural Opens

1. Faezeh Marzbanrad — Monash University

Respiratory Sound AI. Digital stethoscope, neonatal/respiratory sounds, biomedical signal processing, low-cost monitoring. Route: PhD / research master's scholarship. Fit 95/100, funding practicality 72/100. Source: <https://www.monash.edu/medicine/scs/researchers/faezeh-marzbanrad>

2. Mounya Elhilali — Johns Hopkins University

Respiratory Sound AI. Computational audio perception and AI-powered pediatric lung-sound analysis. Route: Funded PhD. Fit 94/100, funding practicality 78/100. Source: <https://engineering.jhu.edu/ece/news/ai-powered-lung-sound-analysis-shows-promise-for-improving-pediatric-pneumonia-diagnosis/>

3. Gari Clifford — Emory University / Georgia Tech

Global Health Signals. Low-cost biomedical signal systems, mHealth, global health, PhysioNet-style clinical AI. Route: Funded PhD. Fit 93/100, funding practicality 82/100. Source: <https://gdclifford.info/>

4. Chung-Wai Chow — University of Toronto / UHN

Respiratory Monitoring. Respiratory oscillometry, lung-function technologies, ML diagnosis, engineer-clinician work. Route: MSc/PhD. Fit 89/100, funding practicality 84/100. Source: <https://ims.utoronto.ca/faculty/chung-wai-chow>

5. Anurag Agarwal — University of Cambridge

Respiratory Sound AI. Stethoscope acoustics, body-sound sensors, heart/lung sound propagation and ML. Route: PhD / funded project. Fit 88/100, funding practicality 50/100. Source: <https://acoustics.eng.cam.ac.uk/about-us/>

6. Ervin Sejdic — University of Toronto

Biomedical Signals. Biomedical signal processing, medical information systems, assistive medical devices. Route: MASc/PhD. Fit 87/100, funding practicality 84/100. Source: <https://www.ece.utoronto.ca/people/sejdic-e/>

7. Udantha Abeyratne — University of Queensland

Respiratory Sound AI. Respiratory sound analysis, sleep apnea, biomedical signal processing and low-cost diagnostics. Route: PhD scholarship. Fit 86/100, funding practicality 65/100. Source: <https://researchers.uq.edu.au/researcher/1206>

8. Xi Long — Eindhoven University of Technology

Vital Signs AI. Time-series biomedical diagnostics, unobtrusive vital signs, trustworthy ML, neonatal/maternal health. Route: Paid PhD vacancy. Fit 84/100, funding practicality 78/100. Source: <https://research.tue.nl/en/persons/xi-long/>

9. Ying Wang — University of Twente

Physiological AI. Hybrid AI, physiological models, multimodal signal analysis and daily-life health monitoring. Route: Paid PhD vacancy. Fit 84/100, funding practicality 78/100. Source: <https://people.utwente.nl/ying.wang>

10. Cecilia Mascolo — University of Cambridge

Mobile Health Audio. Mobile sensing, longitudinal audio data, on-device health ML. Route: PhD / scholarship. Fit 84/100, funding practicality 52/100. Source: <https://www.cl.cam.ac.uk/~cm542/>

11. Delaram Jarchi — University of Essex

Wearables + Respiration. Wearable sensors, respiratory-rate estimation, unobtrusive physiological monitoring. Route: PhD / studentship. Fit 83/100, funding practicality 58/100. Source: <https://www.essex.ac.uk/people/JARCH68309/delaram-jarchi>

12. Maarten De Vos — KU Leuven

Wearable Health AI. AI for health, biosignatures, unobtrusive physiological systems and wearable health monitoring. Route: Project/FWO PhD. Fit 82/100, funding practicality 76/100. Source: <https://gbiomed.kuleuven.be/english/research/50000737/research/HMB/isihealth/our-members/members/00050294>

13. Carolina Varon Perez — KU Leuven

Biomedical Signals. Machine learning, biomedical signal processing, wearable technology and unobtrusive monitoring. Route: Project/FWO PhD. Fit 82/100, funding practicality 76/100. Source: <https://www.esat.kuleuven.be/stadius/stadiusincludes/person.php?id=481>

14. Tapio Seppanen — University of Oulu

Physiological Signals. Physiological signal analysis, respiratory/cardiovascular systems, telemedicine and remote monitoring. Route: Doctoral researcher. Fit 82/100, funding practicality 74/100. Source: <https://www.oulu.fi/en/research-groups/physiological-signal-analysis-group>

15. Edward J. Wang — UC San Diego

Mobile Health Sensors. Smartphone-based medical devices, cheap continuous health monitoring, embedded sensing. Route: Funded PhD. Fit 80/100, funding practicality 72/100. Source: <https://digihealth.ucsd.edu/home>

16. Nasim Katebi — Emory University

Edge Health AI. AI/ML, biomedical signal processing, edge/tiny ML, global and rural health. Route: BMI / CSI PhD. Fit 79/100, funding practicality 78/100. Source: <https://med.emory.edu/departments/biomedical-informatics/people/faculty.html>

17. Roozbeh Jafari — Texas A&M University

Wearable Digital Health. Wearable computer design, signal processing, biosensors, medical devices and digital health. Route: Funded PhD. Fit 79/100, funding practicality 74/100. Source: <https://engineering.tamu.edu/electrical/profiles/jafari-roozbeh.html>

18. Reza Sameni — Emory University

Biomedical Signals. Biomedical signal processing and maternal-child/cardiovascular clinical AI areas. Route: BMI / CSI PhD. Fit 78/100, funding practicality 78/100. Source: <https://med.emory.edu/departments/biomedical-informatics/people/faculty.html>

19. Wenyao Xu — University at Buffalo

AIoT Health. AIoT, wireless sensing, digital health, body sensor networks, biomedical signal analytics. Route: Funded PhD. Fit 78/100, funding practicality 74/100. Source: <https://cse.buffalo.edu/~wenyaoux/>

20. Shwetak Patel — University of Washington

Mobile Health Sensing. Mobile health sensing, ubiquitous computing and low-cost health diagnostics. Route: Funded PhD. Fit 78/100, funding practicality 70/100. Source: <https://homes.cs.washington.edu/~shwetak/>

The 100-Professor Longlist

#	Professor	University	Region	Theme	Route	Fit	Funding	Tier	Why this person belongs
1	Faezeh Marzbanrad	Monash University	Australia	Respiratory Sound AI	PhD / research master's scholarship	95	72	First-wave	Digital stethoscope, neonatal/respiratory sounds, biomedical signal processing, low-cost monitoring.
2	Mounya Elhilali	Johns Hopkins University	USA	Respiratory Sound AI	Funded PhD	94	78	First-wave	Computational audio perception and AI-powered pediatric lung-sound analysis.
3	Gari Clifford	Emory University / Georgia Tech	USA	Global Health Signals	Funded PhD	93	82	First-wave	Low-cost biomedical signal systems, mHealth, global health, PhysioNet-style clinical AI.
4	Chung-Wai Chow	University of Toronto / UHN	Canada	Respiratory Monitoring	MSc/PhD	89	84	First-wave	Respiratory oscillometry, lung-function technologies, ML diagnosis, engineer-clinician work.
5	Ervin Sejdic	University of Toronto	Canada	Biomedical Signals	MASc/PhD	87	84	Strong	Biomedical signal processing, medical information systems, assistive medical devices.
6	Delaram Jarchi	University of Essex	UK	Wearables + Respiration	PhD / studentship	83	58	Strong	Wearable sensors, respiratory-rate estimation, unobtrusive physiological monitoring.
7	Anurag Agarwal	University of Cambridge	UK	Respiratory Sound AI	PhD / funded project	88	50	First-wave	Stethoscope acoustics, body-sound sensors, heart/lung sound propagation and ML.
8	Cecilia Mascolo	University of Cambridge	UK	Mobile Health Audio	PhD / scholarship	84	52	Strong	Mobile sensing, longitudinal audio data, on-device health ML.
9	Xi Long	Eindhoven University of Technology	Netherlands	Vital Signs AI	Paid PhD vacancy	84	78	Strong	Time-series biomedical diagnostics, unobtrusive vital signs, trustworthy ML, neonatal/maternal health.
10	Ying Wang	University of Twente	Netherlands	Physiological AI	Paid PhD vacancy	84	78	Strong	Hybrid AI, physiological models, multimodal signal analysis and data-driven life health monitoring.
11	Tapio Seppanen	University of Oulu	Finland	Physiological Signals	Doctoral researcher	82	74	Strong	Physiological signal analysis, respiratory/cardiovascular systems, telemedicine and remote monitoring.
12	Maarten De Vos	KU Leuven	Belgium	Wearable Health AI	Project/FWO PhD	82	76	Strong	AI for health, biosignatures, unobtrusive physiological systems and wearable health monitoring.
13	Carolina Varon Perez	KU Leuven	Belgium	Biomedical Signals	Project/FWO PhD	82	76	Strong	Machine learning, biomedical signal processing, wearable technology and unobtrusive monitoring.
14	Seraina Dual	KTH Royal Institute of Technology	Sweden	Sensors + Signals	Paid doctoral position	77	76	Watchlist	Biomedical signal processing, wearable/implantable sensors, health monitoring.
15	Fernando Seoane	Karolinska Institutet / University of Borås	Sweden	Wearable Biosignals	Paid doctoral position	76	74	Watchlist	Wearable measurement systems, biosignal processing, noninvasive physiological measurement.
16	Ilangko Balasingham	NTNU	Norway	Medical Signal Networks	Paid PhD fellowship	76	75	Watchlist	Medical signal processing, ML for medical applications, body-area sensor networks.
17	Alexander von Luhmann	TU Berlin / BIFOLD	Germany	Wearable Biosignals	Research-staff PhD	77	73	Watchlist	Miniaturized wearables, body-worn sensors, ML biomarkers from complex biosignals.
18	Wenyao Xu	University at Buffalo	USA	AIoT Health	Funded PhD	78	74	Strong	AIoT, wireless sensing, digital health, body sensor networks, biomedical signal analytics.
19	Nasim Katebi	Emory University	USA	Edge Health AI	BMI / CSI PhD	79	78	Strong	AI/ML, biomedical signal processing, edge/tiny ML, global and rural health.
20	Reza Sameni	Emory University	USA	Biomedical Signals	BMI / CSI PhD	78	78	Strong	Biomedical signal processing and maternal-child/cardiovascular clinical AI areas.
21	Matthew Reyna	Emory University	USA	Clinical ML	BMI / CSI PhD	74	78	Watchlist	AI/ML theory and applications, clinical machine learning and biomedical informatics.
22	Andreas Fhager	Chalmers University of Technology	Sweden	Digital Health Signals	Paid doctoral position	75	75	Watchlist	Biomedical signals and systems, digital health, AI decision support in telemedicine.
23	Nigel Lovell	UNSW Sydney	Australia	Telehealth Biosignals	PhD scholarship	78	66	Strong	Telehealth, biosignal processing, physiological modelling and biomonitoring.
24	Socrates Dokos	UNSW Sydney	Australia	Biomedical Signals	PhD scholarship	72	64	Watchlist	Biomedical signal classification, computational modelling and biomedical engineering.
25	Lionel Tarassenko	University of Oxford	UK	Clinical Monitoring AI	DPhil / funded project	76	52	Watchlist	Signal processing and machine learning for healthcare, vital-sign monitoring, clinical translation.
26	Panicos Kyriacou	City St George's, University of London	UK	Wearable Sensors	PhD / studentship	72	56	Watchlist	PPG, optical biosensors, wearable/non-invasive monitoring and biosignal processing.
27	Roozbeh Jafari	Texas A&M University	USA	Wearable Digital Health	Funded PhD	79	74	Strong	Wearable computer design, signal processing, biosensors, medical devices and digital health.
28	Edward Sazonov	University of Alabama	USA	Wearable Sensors	Funded PhD	70	64	Watchlist	Wearable sensors, body monitoring, signal processing and pattern recognition.
29	Edward J. Wang	UC San Diego	USA	Mobile Health Sensors	Funded PhD	80	72	Strong	Smartphone-based medical devices, cheap continuous health monitoring, embedded sensing.
30	Matthew Smuck	Stanford Medicine	USA	Wearable Health	PhD/postdoc-adjacent	66	50	Niche	Wearable biosensor data for clinical mobility assessment and precision health.
31	Laura Barnes	University of Virginia	USA	Sensing Systems Health	Funded PhD	72	70	Watchlist	Smartphone and wearable sensing for health, behavior, adherence and chronic disease.
32	Rose Faghih	New York University	USA	Biomedical Signals	Funded PhD	76	70	Watchlist	Biomedical signal processing, control systems, computational

#	Professor	University	Region	Theme	Route	Fit	Funding	Tier	Why this person belongs
									medicine.
33	Ki Chon	University of Connecticut	USA	Wearable Biosignals	Funded PhD	77	68	Watchlist	Biosignal processing and wearable devices for cardiovascular/physiological monitoring.
34	Khosrow Behbehani	University of Texas at Arlington	USA	Sleep/Respiratory Signals	Funded PhD	74	64	Watchlist	Bio-signal processing, sleep apnea detection, modeling and clinical translation.
35	Shrikanth Narayanan	University of Southern California	USA	Biosignal AI	Funded PhD	75	70	Watchlist	Biosignal sensing and processing, human-centered behavioral and biomedical signals.
36	Bin He	Carnegie Mellon University	USA	Biomedical Signals	Funded PhD	68	68	Watchlist	Biomedical engineering, functional imaging and neuroengineering signals.
37	Amanda Paluch	University of Massachusetts Amherst	USA	Wearable Health	Funded PhD	64	62	Niche	Wearable technologies for physical activity monitoring and health epidemiology.
38	Frida Sandberg	Lund University	Sweden	Biomedical Signals	Paid/doctoral route	74	70	Watchlist	Biomedical signal processing research group, engineering health and physiological signal analysis.
39	Martin Stridh	Lund University	Sweden	Biomedical Signals	Paid/doctoral route	73	70	Watchlist	Biomedical signal processing research group with cardiopulmonary/physiological-signal relevance.
40	David Clifton	University of Oxford	UK	Clinical ML	DPhil / funded project	76	54	Watchlist	Machine learning for healthcare, physiological monitoring and clinical risk prediction.
41	Tingting Zhu	University of Oxford	UK	Clinical ML	DPhil / funded project	74	54	Watchlist	Machine learning for healthcare, uncertainty, clinical data and physiological monitoring.
42	Stephen Roberts	University of Oxford	UK	Signal ML	DPhil / funded project	70	52	Watchlist	Machine learning, signal processing and biomedical/clinical data applications.
43	Alex Casson	University of Manchester	UK	Wearable Biosignals	PhD / studentship	76	56	Watchlist	Wearable systems, biomedical signal processing, non-invasive monitoring electronics.
44	Esther Rodriguez-Villegas	Imperial College London	UK	Wearable Medical Devices	PhD / studentship	77	55	Watchlist	Wearable medical devices, low-power sensing and respiratory/sleep monitoring translation.
45	Danilo Mandic	Imperial College London	UK	Signal Processing	PhD / studentship	72	55	Watchlist	Signal processing, adaptive learning and biomedical/physiological signal applications.
46	Benny Lo	Imperial College London	UK	Wearable Systems	PhD / studentship	74	55	Watchlist	Body sensor networks, wearable sensing, medical robotics and pervasive health.
47	Payam Barnaghi	Imperial College London	UK	Digital Health AI	PhD / studentship	72	55	Watchlist	Digital health, IoT data, remote monitoring and healthcare AI.
48	Julie McCann	Imperial College London	UK	Sensor Networks	PhD / studentship	65	52	Niche	Sensor networks, adaptive systems and data-driven cyber-physical monitoring.
49	Aldo Faisal	Imperial College London	UK	AI + Biosensing	PhD / studentship	68	54	Watchlist	AI, neurotechnology, biosensors and human-machine systems.
50	Mihaela van der Schaar	University of Cambridge	UK	Clinical ML	PhD / scholarship	70	50	Watchlist	Machine learning for medicine, individualized prediction and clinical decision support.
51	Thomas Heldt	MIT	USA	Physiological Modeling	Funded PhD	74	70	Watchlist	Physiological systems modeling, patient monitoring and cardiovascular/respiratory dynamics.
52	Roger Mark	MIT	USA	Clinical Signals	Funded PhD	72	68	Watchlist	Physiologic signal databases, intensive-care monitoring and clinical signal interpretation.
53	Tom Pollard	MIT / Beth Israel Deaconess	USA	Clinical Data AI	Funded PhD	70	68	Watchlist	Clinical data, open ICU datasets, signal-informed health AI and reproducible medicine.
54	Rosalind Picard	MIT Media Lab	USA	Wearable Health AI	Funded PhD	68	65	Watchlist	Affective computing, wearable sensing, health and human-centered computing.
55	Dina Katabi	MIT CSAIL	USA	Contactless Sensing	Funded PhD	75	68	Watchlist	Wireless sensing, contactless health monitoring and machine learning from ambient signals.
56	Fadel Adib	MIT CSAIL	USA	Wireless Health Sensing	Funded PhD	69	68	Watchlist	Wireless sensing, low-power sensing systems and health-adjacent contactless monitoring.
57	Canan Dagdeviren	MIT Media Lab	USA	Wearable Bioelectronics	Funded PhD	72	66	Watchlist	Conformable bioelectronics, wearable medical devices and personalized physiological sensing.
58	John Guttag	MIT CSAIL	USA	Clinical ML	Funded PhD	66	66	Niche	Computer science, machine learning and clinical data analysis for healthcare.
59	Suchi Saria	Johns Hopkins University	USA	Clinical ML	Funded PhD	68	70	Watchlist	Machine learning for healthcare, clinical decision support and patient risk prediction.
60	Fei Wang	Weill Cornell Medicine	USA	Clinical AI	Funded PhD	66	68	Niche	AI for healthcare, EHR mining, clinical data science and computational medicine.
61	Jimeng Sun	University of Illinois Urbana-Champaign	USA	Health AI	Funded PhD	66	68	Niche	Health AI, machine learning, clinical informatics and trustworthy healthcare analytics.
62	Marinka Zitnik	Harvard Medical School	USA	Biomedical AI	Funded PhD	62	66	Niche	Biomedical AI, graph learning, medicine and translational computational health.
63	Leo Anthony Celi	MIT / Harvard Medical School	USA	Clinical AI	Funded PhD	66	66	Niche	Clinical AI, critical-care data, equitable health AI and data-driven medicine.
64	Shwetak Patel	University of Washington	USA	Mobile Health Sensing	Funded PhD	78	70	Strong	Mobile health sensing, ubiquitous computing and low-cost health diagnostics.
65	Mayank Goel	Carnegie Mellon University	USA	Mobile Health Sensing	Funded PhD	75	70	Watchlist	Smartphone and wearable sensing for health, HCI and low-cost diagnostics.
66	Santosh Kumar	University of Memphis	USA	Mobile Health Sensing	Funded PhD	73	68	Watchlist	Mobile health, wearable sensing, just-in-time interventions and digital phenotyping.

#	Professor	University	Region	Theme	Route	Fit	Funding	Tier	Why this person belongs
67	Nabil Alshurafa	Northwestern University	USA	Wearable Health AI	Funded PhD	72	68	Watchlist	Wearable computing, mHealth, activity and behavior sensing for health.
68	Majid Sarrafzadeh	UCLA	USA	Wireless Health	Funded PhD	70	66	Watchlist	Wireless health, embedded systems, medical monitoring and wearable healthcare systems.
69	Aydogan Ozcan	UCLA	USA	Low-Cost Diagnostics	Funded PhD	70	66	Watchlist	Mobile medical diagnostics, computational sensing, low-cost biomedical imaging and global health.
70	Todd Coleman	Stanford University	USA	Bioelectronics	Funded PhD	72	66	Watchlist	Bioelectronics, digital health, physiological monitoring and wearable medical systems.
71	John A. Rogers	Northwestern University	USA	Wearable Bioelectronics	Funded PhD	68	66	Watchlist	Soft bioelectronics, wearable sensors, physiological monitoring and translational medical devices.
72	Nanshu Lu	University of Texas at Austin	USA	Wearable Bioelectronics	Funded PhD	70	66	Watchlist	Soft bioelectronics, wearable sensors and electronic tattoos for physiological monitoring.
73	Alper Bozkurt	North Carolina State University	USA	Wearable Sensors	Funded PhD	70	66	Watchlist	Wearable sensors, assistive technology, physiological monitoring and IoT health systems.
74	Veena Misra	North Carolina State University	USA	Wearable Sensors	Funded PhD	68	66	Watchlist	ASSIST center, wearable self-powered health monitoring and sensing systems.
75	Omer Inan	Georgia Tech	USA	Wearable Biosignals	Funded PhD	76	70	Watchlist	Wearable physiological sensing, cardiovascular monitoring and translational medical devices.
76	Maysam Ghovanloo	Georgia Tech	USA	Medical Devices	Funded PhD	68	66	Watchlist	Implantable/wearable medical devices, assistive technologies and biomedical circuits.
77	Walt Besio	University of Rhode Island	USA	Biomedical Signals	Funded PhD	66	62	Niche	Biomedical signal processing, electrophysiology and noninvasive sensing instrumentation.
78	Metin Akay	University of Houston	USA	Biomedical Signals	Funded PhD	68	64	Watchlist	Biomedical signal processing, neural engineering and health-related signal analysis.
79	Udantha Abeyratne	University of Queensland	Australia	Respiratory Sound AI	PhD scholarship	86	65	Strong	Respiratory sound analysis, sleep apnea, biomedical signal processing and low-cost diagnostics.
80	Branko Celler	UNSW Sydney	Australia	Telehealth Monitoring	PhD scholarship	72	64	Watchlist	Telehealth, biomedical systems, physiological monitoring and remote care technology.
81	Dinesh Kant Kumar	RMIT University	Australia	Biomedical Signals	PhD scholarship	72	64	Watchlist	Biomedical signal processing, biosignals, assistive health technology and human movement.
82	Sridhar Krishnan	Toronto Metropolitan University	Canada	Biomedical Signals	MASc/PhD	74	72	Watchlist	Biomedical signal analysis, health informatics and machine learning on physiological data.
83	Carolyn McGregor	Ontario Tech University	Canada	Clinical Data AI	MSc/PhD	68	70	Watchlist	Health informatics, neonatal ICU analytics, streaming clinical data and digital health.
84	Tom Chau	University of Toronto / Holland Bloorview	Canada	Assistive Biosignals	MASc/PhD	68	72	Watchlist	Rehabilitation engineering, assistive technology, physiological assessment and pediatric monitoring.
85	Babak Taati	University Health Network / University of Toronto	Canada	Clinical AI	MASc/PhD	66	72	Niche	AI for health, computer vision and signal-informed clinical monitoring for rehabilitation/aging.
86	Alex Mihailidis	University of Toronto	Canada	Assistive Health Tech	MASc/PhD	62	72	Niche	Rehabilitation engineering, intelligent assistive technologies and health systems for aging.
87	Ali Etemad	Queen's University	Canada	Wearable AI	MSc/PhD	70	70	Watchlist	Wearable AI, multimodal learning and human-centered signal understanding.
88	Benoit Gosselin	Universite Laval	Canada	Biomedical Sensors	MSc/PhD	66	68	Niche	Wearable and implantable biomedical circuits, sensing systems and health instrumentation.
89	Kwang Suk Park	Seoul National University	South Korea	Biomedical Signals	PhD	68	60	Watchlist	Biomedical signal instrumentation, physiological monitoring and medical electronics.
90	Yuan-Ting Zhang	City University of Hong Kong	Hong Kong	Wearable Health	PhD	70	60	Watchlist	Wearable biomedical sensors, unobtrusive health monitoring and mHealth systems.
91	Carmen C. Y. Poon	Chinese University of Hong Kong	Hong Kong	Wearable Health	PhD	68	60	Watchlist	Wearable sensing, unobtrusive monitoring and mobile health technologies.
92	Cuntai Guan	Nanyang Technological University	Singapore	Neural Signals	PhD	62	60	Niche	Brain-computer interfaces, neural signal processing and AI for biomedical signals.
93	Chin-Teng Lin	University of Technology Sydney	Australia	AI + Biosignals	PhD scholarship	62	62	Niche	AI, brain-computer interfaces, computational intelligence and physiological signals.
94	Guang-Zhong Yang	Shanghai Jiao Tong University	China	Digital Health Systems	PhD	62	58	Niche	Medical robotics, wearable sensing, digital health systems and translational biomedical engineering.
95	Steffen Leonhardt	RWTH Aachen University	Germany	Biomedical Monitoring	Research-staff PhD	72	70	Watchlist	Medical information technology, unobtrusive monitoring and biomedical signal processing.
96	Bjorn Eskofier	FAU Erlangen-Nurnberg	Germany	Wearable Medical AI	Research-staff PhD	72	70	Watchlist	Machine learning, wearable computing and medical data analytics.
97	Oliver Amft	FAU Erlangen-Nurnberg	Germany	Wearable Computing	Research-staff PhD	70	70	Watchlist	Ubiquitous sensing, wearable computing and digital health systems.
98	Kristof Van Laerhoven	University of Siegen	Germany	Wearable Computing	Research-staff PhD	66	68	Niche	Wearable and ubiquitous computing, activity recognition and sensor-based systems.
99	Paul Lukowicz	RPTU Kaiserslautern-Landau / DFKI	Germany	Wearable Computing	Research-staff PhD	66	68	Niche	Wearable computing, activity recognition, ubiquitous sensing and human-centered AI.
100	Leif Sornmo	Lund University	Sweden	Biomedical Signals	Paid/doctoral route	68	68	Watchlist	Biomedical signal processing, ECG and physiological signal analysis.
