MODERN PORTFOLIO REPORT

Flagship work, organized for reviewers.

A visual guide that connects academic evidence to research potential, employer value, and project execution.

[Open flagship project](#)[Markdown report](#)

PRIMARY THESIS

Engineering work converted into evidence-backed AI and data projects

AUDIENCE

Professors

AUDIENCE

Employers

MODE

Project first

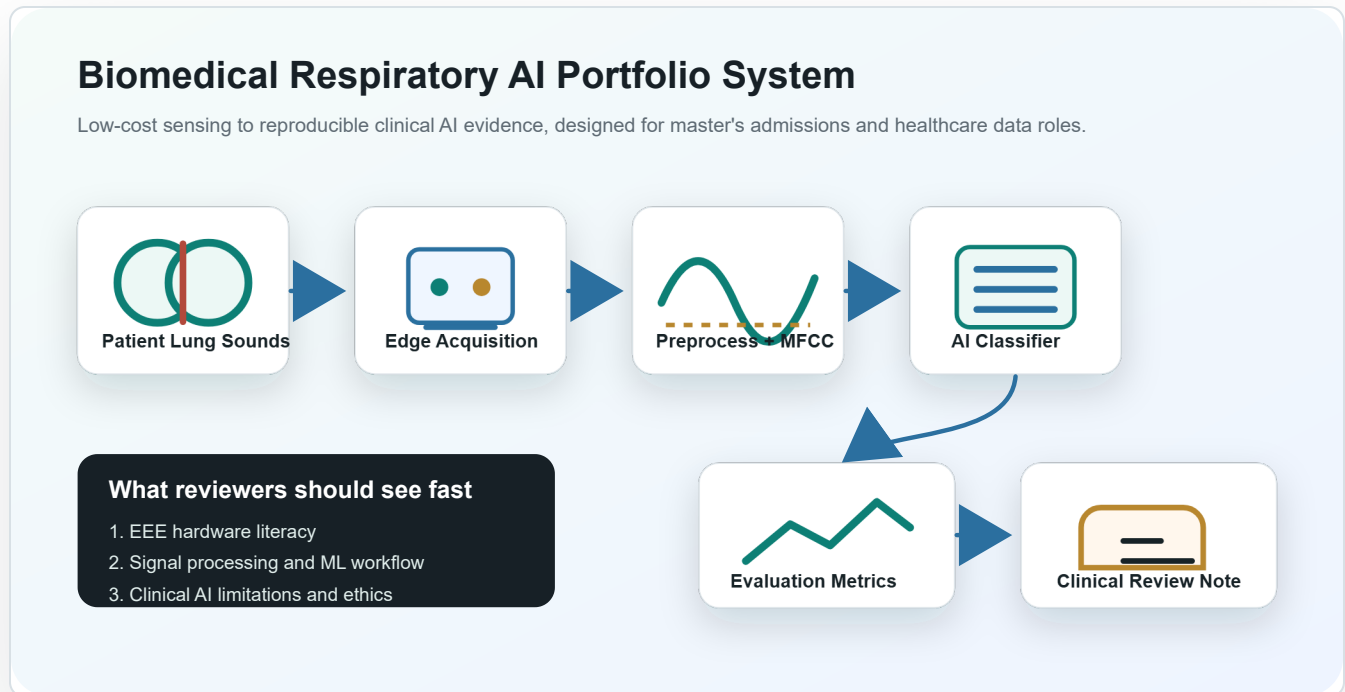

FORMAT

Visual + verifiable

SYSTEM DESIGN

Respiratory AI architecture

The flagship project now has a clean system diagram that shows sensing, preprocessing, model evaluation, and clinical review boundaries.

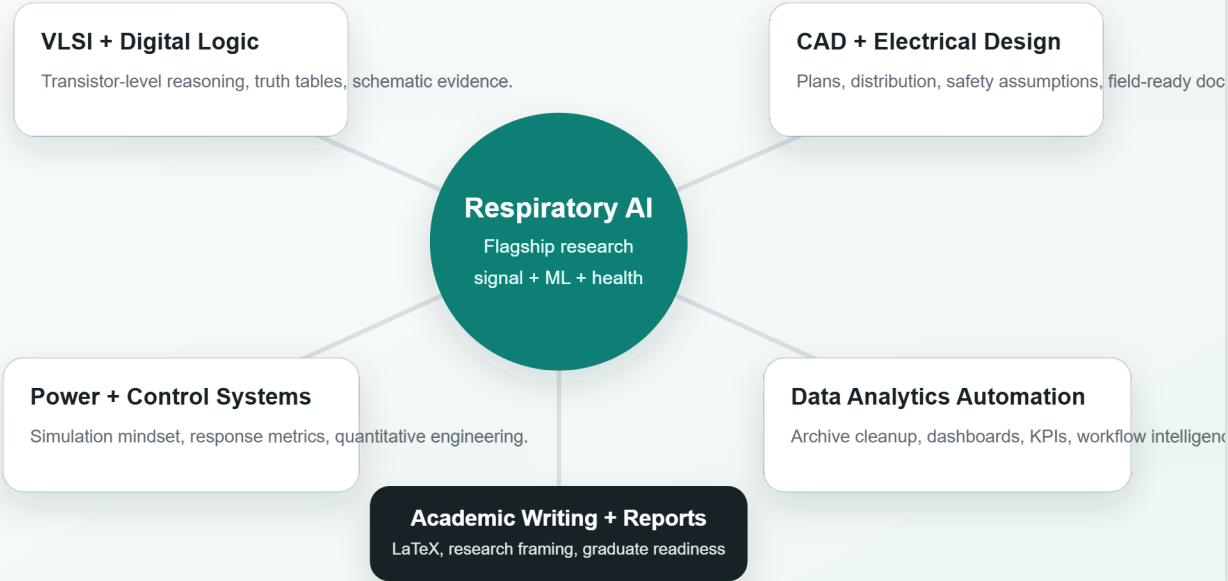

PORTFOLIO LOGIC

Project map

This map makes the repo easier to understand: respiratory AI is the flagship, while VLSI, CAD, power, control, analytics, and writing support the story.

Project Portfolio Map

A coherent story for professors, employers, and technical reviewers.

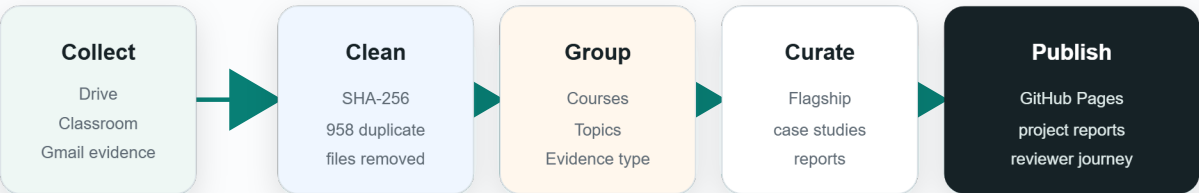

EVIDENCE WORKFLOW

Archive to portfolio pipeline

The archive cleanup itself is presented as a data automation project with measurable outcomes and a clean publishing workflow.

Evidence-to-Portfolio Production Pipeline

How 1,400+ messy academic files became a focused project showcase.

REVIEW PATH

What to read first

For Professors

Start with the respiratory AI project, then inspect the methodology, limitations, ethics, and evidence reports.

For Employers

Start with the homepage, data automation project, VLSI/CAD evidence, and dashboard-style archive metrics.

For Portfolio Review

Use this report as the top-level narrative, then open each project folder for source evidence and documentation.

Sowrav Chowdhury

Flagship portfolio report for research and technical hiring.
