

Academic Archive to Portfolio Strategy

ULAB Classroom and Drive evidence summary for employers and master's professors

Sowrav Chowdhury | EEE, AI, Data Analytics, Embedded Systems

Generated May 27, 2026

Executive Summary

The cleaned local archive contains 478 retained files across 38 course/project folders after removing 958 exact duplicates. The strongest portfolio evidence is concentrated in VLSI design, electrical services design/CAD, power systems, power electronics, control systems, electrical circuits, CSE/programming, and quantitative coursework.

The goal should not be to upload every raw file. The strongest strategy is to curate selected evidence into 5-7 polished GitHub projects with README files, diagrams, methodology, reproducibility notes, and a clear story connecting EEE foundations to Data Science/Engineering and professional analytics work.

Recommended Portfolio Pillars

- AI/Data Science bridge: convert engineering simulations and lab data into notebooks, plots, metrics, and interpretation.
- Engineering systems: showcase VLSI, control, power, and electrical design as evidence of rigorous technical thinking.
- Data analyst professionalism: create clean READMEs, dashboards, summary tables, and decisions from messy source material.
- Graduate readiness: highlight methodology, equations, assumptions, limitations, and reproducibility.

Best Project Ideas to Build First

Priority	Project	Source evidence	Why it helps
1	Respiratory AI / Biomedical Signal Portfolio	Existing background plus AI/lung sound work	Directly matches Data Science/Engineering, AI, healthcare, and current Augmedix profile.
2	VLSI Logic Gate Design Case Study	EEE 426/ETE 448 VLSI Lab files	Shows low-level rigor, diagrams, experimental reports, and documentation depth.
3	Electrical Services Design CAD Portfolio	EEE 316 PDFs and DWG files	Very visual, employer-friendly, and demonstrates applied engineering deliverables.
4	Power Systems Simulation Notebook	EEE 308 / EEE 210 / Power Electronics files	Strong bridge from EEE to quantitative modeling and reproducible analysis.
5	Control Systems Analysis Dashboard	Control System Lab and MATLAB/Simulink files	Lets you show metrics, plots, model comparison, and analytical storytelling.
6	Academic Data Extraction and Portfolio Automation	This archive workflow and manifests	Shows automation, data organization, evidence management, and professional documentation.

Recommended GitHub structure: one private raw-evidence archive, one curated public/private portfolio repo, and one README-driven index page that maps each project to skills: Python, MATLAB/Simulink, CAD, signal processing, AI, LaTeX, and data analysis.

Course-by-Course Content and Portfolio Ideas

GED103- History of Emergence of Independent Bangladesh 13- Monday -Wednesday-2_40-4_00 PM

Electrical services design / CAD. Contains 70 office documents/decks/sheets totaling about 23.8 MB. File names indicate assignments.

Retained files: 70 | Size: 23.8 MB | Main types: docx:70

Professor angle: Shows engineering design documentation, applied constraints, and ability to produce professional technical deliverables.

Employer angle: Frame as attention to detail, technical documentation, systems thinking, and engineering ownership.

Project idea	How to develop it
Electrical Services Design Portfolio	Turn the DWG/PDF layouts into a professional building electrical design case study: load estimation, circuit distribution, single-line assumptions, fixture planning, and safety/code considerations.
CAD-to-Documentation Workflow	Publish cleaned drawings with a README explaining design constraints, deliverables, bill-of-material style tables, and lessons learned.
Communication and Analysis Evidence	Use selected reports/presentations to show writing, teamwork, research framing, and analytical communication for graduate applications.

Representative retained files	Type	MB

Lab Electrical Circuits I 2

Electrical circuits laboratory. Contains 7 PDF reports/handouts, 33 compressed submission packages totaling about 158.9 MB. File names indicate coursework and supporting material.

Retained files: 40 | Size: 158.9 MB | Main types: zip:33 pdf:7

Professor angle: Supports academic breadth, communication, and evidence of sustained coursework.

Employer angle: Frame as communication, project organization, and disciplined documentation.

Project idea	How to develop it
Circuit Analysis Lab Portfolio	Create a lab-report series showing objective, theory, measured/simulated data, error analysis, and final conclusions for each experiment.
PSpice / Circuit Simulation Archive	Rebuild key circuits in a modern reproducible format and explain simulation setup, assumptions, and results.

ENG 103 (Summer 2020) 7 (S&T, 10_00-11_20)

General education / communication. Contains 30 office documents/decks/sheets totaling about 13.4 MB. File names indicate final submissions, assignments.

Retained files: 30 | Size: 13.4 MB | Main types: docx:30

Professor angle: Supports academic breadth, communication, and evidence of sustained coursework.

Employer angle: Frame as communication, project organization, and disciplined documentation.

Project idea	How to develop it		
Communication and Analysis Evidence	Use selected reports/presentations to show writing, teamwork, research framing, and analytical communication for graduate applications.

EEE 426_ ETE 448 VLSI Lab 1

VLSI / semiconductor design. Contains 13 PDF reports/handouts, 7 circuit/layout source files totaling about 14.5 MB. File names indicate lab reports, final submissions, open-ended work.

Retained files: 20 | Size: 14.5 MB | Main types: pdf:13 msk:5 sch:2

Professor angle: Shows hardware-oriented reasoning, semiconductor design exposure, and ability to explain low-level systems clearly.

Employer angle: Frame as attention to detail, technical documentation, systems thinking, and engineering ownership.

Project idea	How to develop it		
VLSI Lab Portfolio Case Study	Rebuild the CMOS inverter/NOR/OR/AND experiments into a documented mini-project with schematic, layout screenshots, truth tables, delay/power discussion, and reproducibility notes.		
From Logic Gate to Layout Report	Create a GitHub folder explaining transistor-level design flow, layout verification assumptions, and what each .MSK/.sch artifact demonstrates.

EEE 316 Electrical Services Design Lab Summer 2022

VLSI / semiconductor design. Contains 13 PDF reports/handouts, 3 AutoCAD drawing files totaling about 36.8 MB. File names indicate lab reports, final submissions.

Retained files: 16 | Size: 36.8 MB | Main types: .pdf:13, .dwn:3

Professor angle: Shows hardware-oriented reasoning, semiconductor design exposure, and ability to explain low-level systems clearly.

Employer angle: Frame as attention to detail, technical documentation, systems thinking, and engineering ownership.

Project idea	How to develop it		
Electrical Services Design Portfolio	Turn the DWG/PDF layouts into a professional building electrical design case study: load estimation, circuit distribution, single-line assumptions, fixture planning, and safety/code considerations.		
CAD-to-Documentation Workflow	Publish cleaned drawings with a README explaining design constraints, deliverables, bill-of-material style tables, and lessons learned.

EEE 434 ETE 446 Power Electronics Lab Summer 2022

Power electronics and power systems. Contains 13 PDF reports/handouts, 1 office documents/decks/sheets totaling about 20.7 MB.

File names indicate lab reports, presentations.

Retained files: 14 | Size: 20.7 MB | Main types: pdf:13 pptx:1

Professor angle: Shows modeling, simulation, quantitative analysis, and an engineering-to-data-science bridge.

Employer angle: Frame as simulation, analysis, debugging, and translating technical outputs into decisions.

Project idea	How to develop it
Power Systems Simulation Notebook	Convert Simulink/MATLAB lab work into a reproducible analysis notebook covering transformer tests, equivalent circuit estimation, and plots.
Power Electronics Lab Compendium	Create concise READMEs for each experiment with circuit objective, expected waveforms, simulation parameters, and interpretation.

Control System Lab Sum'22 EEE 404

Control systems and simulation. Contains 10 PDF reports/handouts totaling about 17.6 MB. File names indicate lab reports, open-ended work.

Retained files: 10 | Size: 17.6 MB | Main types: .pdf:10

Professor angle: Shows modeling, simulation, quantitative analysis, and an engineering-to-data-science bridge.

Employer angle: Frame as simulation, analysis, debugging, and translating technical outputs into decisions.

Project idea	How to develop it
Control Systems Modeling Portfolio	Package the lab reports and models into a project showing transfer functions, time-domain response, controller tuning, and stability interpretation.
Simulation-to-Insight Dashboard	Use Python/MATLAB outputs to create plots comparing overshoot, settling time, steady-state error, and controller performance.
Communication and Analysis Evidence	Use selected reports/presentations to show writing, teamwork, research framing, and analytical communication for graduate applications.

Spring 2022 CSE480-S&T-10AM-11_20AM 1

Programming and computing. Contains 2 PDF reports/handouts, 4 compressed submission packages totaling about 13.2 MB. File names indicate coursework and supporting material.

Retained files: 9 | Size: 13.2 MB | Main types: .zip:4 .pdf:2 .rar:2 .txt:1

Professor angle: Shows computational foundations that can be strengthened into reproducible research code.

Employer angle: Frame as data analyst foundations: coding, quantitative reasoning, reproducible notebooks, and clear interpretation.

Project idea	How to develop it
Programming Foundations Evidence	Curate representative code into a small clean repo with problem statements, complexity notes, and testing examples.
Academic Code Modernization	Refactor old coursework into Python notebooks or scripts with README documentation, test cases, and portfolio-grade structure.

Control System Summer 22 EEE 403 (1)

Control systems and simulation. Contains 1 PDF reports/handouts, 1 Simulink models, 1 MATLAB scripts, 2 office documents/decks/sheets totaling about 16.6 MB. File names indicate open-ended work, presentations.

Retained files: 5 | Size: 16.6 MB | Main types: .pptx:2 .pdf:1 .m:1 .slx:1

Professor angle: Shows modeling, simulation, quantitative analysis, and an engineering-to-data-science bridge.

Employer angle: Frame as simulation, analysis, debugging, and translating technical outputs into decisions.

Project idea	How to develop it
Power Systems Simulation Notebook	Convert Simulink/MATLAB lab work into a reproducible analysis notebook covering transformer tests, equivalent circuit estimation, and plots.
Power Electronics Lab Compendium	Create concise READMEs for each experiment with circuit objective, expected waveforms, simulation parameters, and interpretation.
Control Systems Modeling Portfolio	Package the lab reports and models into a project showing transfer functions, time-domain response, controller tuning, and stability interpretation.

EEE 305_Spring 2022 1

General education / communication. Contains 3 PDF reports/handouts, 2 office documents/decks/sheets totaling about 20.5 MB. File names indicate final submissions.

Retained files: 5 | Size: 20.5 MB | Main types: .pdf:3 .pptx:2

Professor angle: Supports academic breadth, communication, and evidence of sustained coursework.

Employer angle: Frame as communication, project organization, and disciplined documentation.

Project idea	How to develop it		
Communication and Analysis Evidence	Use selected reports/presentations to show writing, teamwork, research framing, and analytical communication for graduate applications.

Fall 2021 GED 317(section-2)

Mathematics and statistics. Contains 4 PDF reports/handouts, 1 office documents/decks/sheets totaling about 5.3 MB. File names indicate coursework and supporting material.

Retained files: 5 | Size: 5.3 MB | Main types: .pdf:4 .docx:1

Professor angle: Supports graduate readiness in quantitative reasoning and statistical thinking.

Employer angle: Frame as data analyst foundations: coding, quantitative reasoning, reproducible notebooks, and clear interpretation.

Project idea	How to develop it
Statistics Refresher for Data Science	Convert statistics/math evidence into a short notebook portfolio covering descriptive statistics, distributions, regression basics, and interpretation.
Communication and Analysis Evidence	Use selected reports/presentations to show writing, teamwork, research framing, and analytical communication for graduate applications.

MAT201-Summer2021

Mathematics and statistics. Contains 5 PDF reports/handouts totaling about 4.9 MB. File names indicate quiz/exam evidence.

Retained files: 5 | Size: 4.9 MB | Main types: .pdf:5

Professor angle: Supports graduate readiness in quantitative reasoning and statistical thinking.

Employer angle: Frame as data analyst foundations: coding, quantitative reasoning, reproducible notebooks, and clear interpretation.

Project idea	How to develop it		
Statistics Refresher for Data Science	Convert statistics/math evidence into a short notebook portfolio covering descriptive statistics, distributions, regression basics, and interpretation.

Digital Electronics Lab - ETE 205 _ EEE 302

Academic coursework evidence. Contains 4 PDF reports/handouts totaling about 7.0 MB. File names indicate coursework and supporting material.

Retained files: 4 | Size: 7.0 MB | Main types: .pdf:4

Professor angle: Supports academic breadth, communication, and evidence of sustained coursework.

Employer angle: Frame as communication, project organization, and disciplined documentation.

Project idea	How to develop it		
Course Evidence Summary	Use this folder as private supporting evidence and only publish cleaned, non-sensitive artifacts with a short README.

EEE 425_ ETE 447 VLSI 1

VLSI / semiconductor design. Contains 2 PDF reports/handouts totaling about 0.7 MB. File names indicate assignments.

Retained files: 3 | Size: 0.7 MB | Main types: .pdf:2 .txt:1

Professor angle: Shows hardware-oriented reasoning, semiconductor design exposure, and ability to explain low-level systems clearly.

Employer angle: Frame as attention to detail, technical documentation, systems thinking, and engineering ownership.

Project idea	How to develop it		
VLSI Lab Portfolio Case Study	Rebuild the CMOS inverter/NOR/OR/AND experiments into a documented mini-project with schematic, layout screenshots, truth tables, delay/power discussion, and reproducibility notes.		
From Logic Gate to Layout Report	Create a GitHub folder explaining transistor-level design flow, layout verification assumptions, and what each .MSK/.sch artifact demonstrates.

How to Turn This Into a Strong GitHub Portfolio

Step	Action	Output
1	Choose only high-signal materials from each course folder.	Clean project folder, no duplicates, no private grading artifacts.
2	Create a README with objective, methodology, equations, tools, results, limitations, and reproducibility.	Professor-ready technical narrative.
3	Convert reports into visuals: block diagrams, tables, plots, screenshots, and workflow images.	Employer-friendly scanning experience.
4	Add code/notebooks where possible: Python analysis, MATLAB scripts, or simulation reproduction.	Data Science/Engineering relevance.
5	Write a root portfolio index mapping projects to skills and outcomes.	Clear hiring/admissions story.

README Template for Each Project

- Problem / objective: what the project proves.
- Technical background: equations, assumptions, architecture, or system diagram.
- Methodology: tools, steps, data, simulation setup, or experimental procedure.
- Results: plots, tables, screenshots, interpretation, and error/limitation notes.
- Reproducibility: how to run code, open files, regenerate plots, or inspect deliverables.
- Portfolio framing: skills demonstrated and relevance to Data Science/Engineering or analyst roles.

Full Retained File Inventory

The following inventory lists retained raw files after duplicate removal. Use it as a private source map when selecting files for curated portfolio projects.

Appendix: Cleanup and Evidence Controls

- Exact duplicate deletion log: C:\Users\User\Documents\New project\ULAB_Classroom_Drive_Archive\00_manifests\duplicate_removal_log.csv
- Recovered-file organization log: C:\Users\User\Documents\New project\ULAB_Classroom_Drive_Archive\00_manifests\recovered_file_organization_log.csv
- SHA-256 file manifest: C:\Users\User\Documents\New project\ULAB_Classroom_Drive_Archive\00_manifests\local_archive_file_manifest.csv
- Raw coursework should remain private unless explicitly cleaned and appropriate to publish.
- For professor review, emphasize methodology, rigor, equations, reproducibility, and reflection. For employers, emphasize outcomes, visuals, tools, and decision-ready documentation.
